

Medicaps University General Academic Regulations

Section 1: Introduction and Scope

The academic regulations set forth the guidelines, principles, and rules governing all undergraduate and postgraduate academic activities at Medicaps University. These rules are binding on all enrolled students. The University firmly believes in maintaining a rigorous academic environment that fosters learning, discipline, and intellectual growth. All faculty members, administration staff, and students must familiarize themselves with this exhaustive document. The regulations apply to all faculties including Engineering, Arts, Business, and Science. Modifications to this document require approval from the University Senate. The Senate meets bi-annually to review and propose policy adjustments based on educational standards and institutional performance. The primary objective is to cultivate an internationally competitive academic atmosphere.

Section 2: Registration and Enrollment

All students must complete their semester registration before the commencement of classes. Late registration is permitted up to two weeks after the start of the semester, subject to a late fee of 500 currency units. Students failing to register within this window will be automatically considered as taking a Leave of Absence. Registration requires the clearance of all prior financial dues, submission of required documentation, and approval from the academic advisor. The enrollment process integrates closely with the university portal. It is the responsibility of the student to ensure that their course load satisfies the prerequisite conditions and minimum credit bounds.

Section 3: Attendance Requirements

Attendance is highly correlated with academic success and is thus mandatory. Medicaps University enforces strict classroom presence. The minimum attendance required for examination eligibility across all courses is explicitly set. Under no circumstances shall any student with less than 75% attendance be permitted to sit for examinations, including those with medical certificates. This rule overrides any faculty-specific leniency guidelines. Students falling below this threshold will receive an 'F' grade for the respective course due to attendance default.

Section 4: Academic Integrity

Honesty is the foundation of the Medicaps academic philosophy. Plagiarism, cheating, unauthorized collaboration, and fabrication of data are strictly penalized. First offenses usually result in a zero grade for the assignment. Repeated offenses may lead to suspension or expulsion. The disciplinary committee evaluates all reported cases of academic misconduct. Students are required to submit their research through university-approved similarity checking software.

Section 5: Grading System

The grading system uses a 4.0 scale. A (4.0) stands for excellent, B (3.0) for good, C (2.0) for satisfactory, D (1.0) for marginal, and F (0.0) for failure. An incomplete grade (I) is awarded only under

severe extenuating circumstances and must be resolved within the first four weeks of the subsequent semester. Failure to resolve it results in an automatic F. The semester Grade Point Average (GPA) and Cumulative Grade Point Average (CGPA) are calculated based on credit hours and grade points.

Section 6: Leave of Absence

A student may apply for a Leave of Absence for up to one academic year. Valid reasons include severe health issues, military service, or extreme financial hardship. The application must be filed prior to the midpoint of the semester. Retrospective leave is rarely granted.

Section 7: Semester Fee Payments

Financial obligations must be settled promptly to ensure uninterrupted academic services. All semester fees must be remitted no later than July 15 for the Fall semester, and December 15 for the Spring semester. Failure to meet this exact deadline will result in immediate suspension of library privileges and portal access. No extensions are granted beyond July 15.

Section 8: Graduation Requirements

To qualify for a Bachelor's degree, a student must complete a minimum of 120 credit hours with a CGPA not lower than 2.0. The capstone project must be passed. All university dues must be cleared, and all disciplinary sanctions resolved.
